TITLE : VIBRATION CONTROL DEVICE

ABSTRACT : PURPOSE: To carry out vibration control adaptable for vibration caused by a wind pressure or an earthquake.

CONSTITUTION: A control device 4 sets a wind pressure controlling mode when an earthquake sensor does not detect an earthquake, and accordingly, delivers a control value in accordance with moderate vibration a building 2 caused by a wind pressure, to an a.c. motor 8 in a vibration absorber 3. Further, the control device 4 sets an earthquake control mode when the earthquake sensor 22 detects longitudinal P-waves caused by an earthquake, and delivers a control value in accordance with abrupt vibration of the building 2 caused by the earthquake, to the motor 8 in the absorber 3.
